Evidence:

Frontend CI(Continuous Integration):

The screenshot displays the GitHub Actions interface for a workflow named "Frontend CI #2". The workflow is shown as successful, triggered manually last week. The summary table indicates a status of "Success" with a total duration of "1m 28s". The workflow file is "frontend-ci.yml" on the "main" branch. The job details show three steps: "Frontend Lint" (33s), "Frontend Tests" (44s), and "Frontend Build" (36s). The "Frontend Build" step is the final step in the sequence. The annotations section shows 3 warnings, including a deprecation warning for Node.js 20 and a warning for the "Frontend Tests" step.

Step	Duration
Frontend Lint	33s
Frontend Tests	44s
Frontend Build	36s

Backend CI (Continuous Integration):

Issue:

Current Status / AWS Resource Issue:

I have completed the Frontend CI and Backend CI workflows, including linting, automated tests, and build steps, and I have also configured the Backend CD workflow.

I understand that the AWS classroom credentials are temporary and need to be updated when they expire. However, my current issue is that the **Udacity AWS Cloud Resource itself is not starting**. I am unable to start the AWS resources and therefore cannot access the AWS Console or obtain the fresh credentials required for the final CD deployment and verification.

I have already **submitted a request to Udacity Support and also emailed Udacity regarding this issue**. I have attached a screenshot showing the AWS Cloud Resource startup issue as evidence.

Because the AWS resource is not starting, I am currently unable to complete the remaining CD deployment verification, including the LoadBalancer URLs and deployment screenshots.

Backend CD:

The screenshot shows the GitHub Actions interface for a workflow named "Backend CD #2". The workflow is triggered manually and is currently in a "Failure" state. The summary shows a total duration of 58s. The workflow steps are: Backend Link (40s), Backend Tests (45s), Backend Build (4s), and Backend Deploy. The "Backend Build" step has failed. The annotations section shows 1 error and 3 warnings. The error message is: "The security token included in the request is invalid." The warning message is: "Node.js 20 is deprecated. The following actions target Node.js 30 but are being forced to run on Node.js 20: actions/checkout@v4, actions/setup-python@v5, For mo-".

Backend CD #2

Summary

Manually triggered 7 hours ago

Status: Failure

Total duration: 58s

Artifacts: -

backend-cd.yml
on: workflow_dispatch

Backend Link (40s) → Backend Tests (45s) → Backend Build (4s) → Backend Deploy

Annotations

1 error and 3 warnings

Backend Build

The security token included in the request is invalid.

Backend Link

Node.js 20 is deprecated. The following actions target Node.js 30 but are being forced to run on Node.js 20: actions/checkout@v4, actions/setup-python@v5, For mo-

The screenshot shows the Udacity "Resubmit Project" interface. A modal dialog titled "Cloud Resources" is displayed, indicating that the "AWS Resources" are inactive. The message says: "Your Cloud Resource is inactive. Remember to check back here to monitor your budget allocation. Learn More". There are buttons for "Resubmit" and "Open Cloud Console". The background shows the "Resubmit Project" form with a "Go Back" button and a "SUBMIT PROJECT" button. The "SUBMIT PROJECT" button is disabled. The "Upload Zip File" section is visible. The "DevOps for ATCI" progress bar is at 99%. The "Project: Movie Picture Pipeline" is selected. The "Project Overview" section is expanded. The "Project Workspace" section is expanded. The "Project Rubric" section is expanded. The "Submit Project" button is disabled. The "Lesson Resources" section is expanded. The "Cloud Resources" section is expanded. The "Ask Marvin" chat window is open on the right side of the screen. The chat window shows a message from Marvin: "cloud resources are not starting". The chat window also shows a message from the user: "cloud resources are not starting... i clicked start resources but it was not starting". The chat window also shows a message from Marvin: "That's frustrating. First try a quick refresh of the lesson page, then open the lesson panel again and click Cloud Resources to see whether the status changes after a minute or two. If it still won't start, try: open the classroom in an incognito/private window use Chrome if you aren't already disable browser extensions try a different network If none of that helps, I can contact Udacity support for you. If you want that, tell me your browser and I'll file it." The chat window also shows a message from the user: "all things done i guess there is issue with udacity only". The chat window also shows a message from Marvin: "Summarize this page Quiz me on this page Give me a practice exercise for this". The chat window also shows a message from the user: "Ask anything". The chat window also shows a message from Marvin: "10:54 PM 9/4/2026".

UDACITY

Resubmit Project

Go Back

When you have completed your project, please submit the link to your GitHub project repository for review. Ensure that you have implemented the following workflows using GitHub Actions:

1. CI workflow for backend application
2. Continuous Deployment workflow for backend application
3. Continuous Integration workflow for frontend application
4. Continuous Deployment workflow for frontend application
5. Submit working URLs or equivalent screenshots

All linting, testing, building, and deployment steps are successful. Review the rubric for explicit detail on how to submit your project.

Ask Marvin

cloud resources are not starting

What's going on — are you seeing an error message, or do the Cloud Resources just stay stuck while provisioning? If you can paste the exact message or describe what you see, I can help narrow down whether it's a temporary provisioning delay, a browser issue, or something support needs to fix.

cloud resources are not starting... i clicked start resources but it was not starting

That's frustrating. First try a quick refresh of the lesson page, then open the lesson panel again and click **Cloud Resources** to see whether the status changes after a minute or two.

If it still won't start, try:

- open the classroom in an incognito/private window
- use Chrome if you aren't already
- disable browser extensions
- try a different network

If none of that helps, I can contact Udacity support for you. If you want that, tell me your browser and I'll file it.
